

# Invitation

Be Absolutely Assured

Please join NATA for an information session on the Government's Diagnostic Imaging Accreditation Scheme Stage II (DIAS) and learn how it can add value to your business.

Stage II of the Department of Health and Ageing's Diagnostic Imaging Accreditation Scheme will commence on 1 July 2010. Providers of non-radiology services such as cardiac imaging, nuclear medicine imaging, and obstetric and gynaecological ultrasound will now be able to participate in the scheme to be eligible to provide Medicare funded services.

### What you will learn

You will achieve an understanding of the regulatory scheme and receive updated information about the Health Insurance Amendment (Diagnostic Imaging Accreditation) Bill 2010, the Diagnostic Imaging Practice Accreditation Standards, implementation arrangements, assessment process, and information on pathways to RANZCR/NATA Accreditation.

### Pathways to accreditation

The Commonwealth Department of Health and Ageing (DoHA) automatically recognises all facilities accredited under the RANZCR / NATA joint accreditation program as having met its compulsory DIAS requirements. Facilities accredited

under DoHA's DIAS II through NATA are able to upgrade their accreditation at a later date to the full RANZCR/NATA Medical Imaging Accreditation Program (MIAP).

### Participants

This information session is open to all health professionals employed in diagnostic imaging practices.

### Time

Refreshments served at 5.30pm. Information session from 6pm – 7.30 pm.
